

Client

Brief

Design and deliver a high-impact exhibition stand for J&C Aero that effectively showcases products, reinforces brand identity, and facilitates meaningful client engagement.

Solution

A 50m² exhibition space featuring seven product displays, a four-metre-high feature wall, and multiple meeting areas. The design incorporates J&C Aero's Hexagon brand identity across wall graphics, with integrated LED lighting to highlight key areas such as the reception counter and enhance the overall aesthetic with a clean, modern finish. The structure has been refined year-on-year to continually improve functionality and presentation.

Result

A visually striking, highly functional exhibition stand that elevates brand presence, supports client interaction, and effectively showcases products and services. The ongoing partnership has enabled continuous design improvements, delivering stronger results with each iteration.
